***Temporary Approval
Information and Consent***

The dental temporaries placed on your teeth today have approximately the same shape and design as the final porcelain restorations that will be made for you. They were specifically constructed using the shapes and forms of the **Aesthetic Diagnostic Wax Up** that you previously approved. The temporaries are not made of porcelain, so they do not reflect the final color. However, the dental laboratory technicians will use their **shape** and **form** to make your final restorations.

Patient Agreement with Signature

I understand that the shapes and forms of my temporaries will be duplicated in my final restorations and that I am not evaluating the color of the final restorations based upon these temporaries. **I approve the shape and form of my temporaries for use in constructing my final restorations.** I understand that I do not have to give my approval at this moment and that I have the option of wearing the temporaries for some time before giving my final approval. If I do give my approval today, I agree to come back in to the Atlanta Dental Group PC office within the next two days if I desire changes to be made to the shape and/or form, otherwise I agree to accept the final restorations with this design.

I have had all my questions answered regarding my temporaries and my dental procedures. I understand this consent form and the staff have answered all of my questions related to this procedure.
